

## PROFESSIONAL SUMMARY

Recent B.Tech Computer Science graduate with hands-on experience developing AI-powered applications, full-stack web applications, and machine learning solutions through academic projects. Proficient in Python, JavaScript, React.js, Node.js, Flask, TensorFlow, and PostgreSQL, with strong foundations in algorithms, data structures, REST API development, database design, software engineering, and problem solving.

## EDUCATION

**Graphic Era Hill University, Dehradun**  
B.Tech in Computer Science and Engineering

Aug 2022 – May 2026  
CGPA: 7.22

## TECHNICAL SKILLS

**Languages:** C, C++, Java, Python, JavaScript, SQL

**Frontend:** React.js, HTML, CSS, Tailwind CSS

**Backend:** Node.js, Express.js, Flask, FastAPI

**AI/ML:** TensorFlow, Keras, Scikit-learn, OpenCV, NumPy, NLTK

**Databases:** PostgreSQL, MongoDB, SQLite

**Tools:** Git, GitHub, VS Code, JupyterLab, Google Colab, Vercel, Render

## PROJECTS

**DeepFake Detection System | Python, EfficientNet-B4, MTCNN, TensorFlow, OpenCV**

[GitHub](#)

- Fine-tuned a pretrained EfficientNet-B4 backbone via transfer learning for real/fake classification.
- Applied MTCNN-based face detection and cropping to isolate facial regions, improving classifier signal.
- Built a Flask REST API for image and video uploads with real-time confidence scores.
- Optimized pipeline to analyze images in under 3 seconds and videos in under 30 seconds.
- Analyzed videos by sampling 30 evenly-spaced frames and aggregating per-frame predictions into a verdict.

**AI Job Tracker | React.js, Node.js, Express.js, MongoDB, Gemini API**

[GitHub](#) | [Live Demo](#)

- Built a full-stack job application tracker with JWT-secured user accounts and profiles.
- Designed a status pipeline (Applied, Interview, Offer, Rejected) with REST CRUD endpoints.
- Integrated the Gemini API to auto-generate tailored cover letters from user profile data.
- Built an AI-powered ATS score checker that scores resume-job fit and flags missing keywords.
- Modeled users and job applications with Mongoose, linked via referenced ObjectIds.

**Air Quality Predictor | React.js, FastAPI, Random Forest, SQLite**

[GitHub](#) | [Live Demo](#)

- Built a full-stack ML app using Random Forest to forecast PM2.5 levels with an  $R^2$  of 0.89.
- Integrated Open-Meteo APIs with FastAPI and SQLite for real-time air quality data.
- Developed a React dashboard with Leaflet maps and Chart.js visualizations.
- Implemented an SQLite caching layer to store API responses and log search history, cutting redundant calls.

## CERTIFICATIONS

- Completed the Cybersecurity Job Simulation Analyst certification.
- Earned the Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate certification.
- Completed Introduction to Generative AI by Google Cloud & Simplilearn SkillUp.

## COURSEWORK SKILLS

- Data Structures and Algorithms (DSA)
- Machine Learning (ML)
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOP)
- Computer Networks (CN)
- Software Development Life Cycle (SDLC)
- Operating Systems (OS)
