

PROFESSIONAL SUMMARY

Recent B.Tech Computer Science graduate with hands-on experience in AI/ML and full-stack web development through academic projects. Proficient in Python, React.js, Flask, TensorFlow, and PostgreSQL, with a strong foundation in data structures, databases, and software engineering.

EDUCATION

Graphic Era Hill University, Dehradun
B.Tech in Computer Science and Engineering

Aug 2022 – May 2026
CGPA: 7.22

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL

Web Development: HTML, CSS, JavaScript, React.js, Flask

ML/DL Libraries: TensorFlow, Keras, OpenCV, NumPy, MTCNN

Databases: PostgreSQL (Supabase)

Tools: Git, GitHub, VS Code, JupyterLab, Google Colab

PROJECTS

DeepFake Detection System — Python, TensorFlow, EfficientNet-B4, OpenCV, Flask

[GitHub](#)

- Developed an AI-powered deepfake detection web application using EfficientNet-B4 deep learning model.
- Integrated MTCNN for face detection and preprocessing to improve model prediction reliability
- Built a Flask REST API supporting image (JPG, PNG) and video (MP4, AVI, MOV) uploads with confidence scores
- Optimized pipeline to analyze images in under 3 seconds and short videos in under 30 seconds.

Modern Expense Tracker — React.js, Supabase(PostgreSQL), JavaScript, HTML, CSS

[GitHub](#)

- Developed a full-stack expense tracking application with secure authentication using Supabase Auth and PostgreSQL.
- Implemented full CRUD operations with real-time PostgreSQL database synchronization.
- Built an interactive analytics dashboard with monthly trends, category-wise spending, and responsive data visualizations.
- Designed reusable React components with responsive UI, improving usability across desktop and mobile devices.
- Deployed the application on Vercel with continuous deployment from GitHub, enabling live production access.

Sudoku Validator Web App — Flask, C++, HTML, CSS, JavaScript

[GitHub](#)

- Developed a Sudoku solution validator web app using Flask (Python) and C++.
- Implemented algorithms to validate Sudoku rules across rows, columns, and 3×3 subgrids.
- Built REST APIs to process Sudoku grid inputs and return validation results.
- Designed a responsive UI using HTML, CSS, and JavaScript for user interaction.

CERTIFICATIONS

- Completed the Cybersecurity Job Simulation Analyst certification.
- Earned the Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate certification.
- Completed Introduction to Generative AI by Google Cloud & Simplilearn SkillUp.

COURSEWORK SKILLS

- Data Structures and Algorithms (DSA)
- Machine Learning (ML)
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOP)
- Computer Networks (CN)
- Software Development Life Cycle (SDLC)
- Operating Systems (OS)
