

PROFESSIONAL SUMMARY

Recent B.Tech Computer Science graduate with hands-on experience in AI/ML and full-stack web development through academic projects. Proficient in Python, React.js, Flask, TensorFlow, and PostgreSQL, with a strong foundation in data structures, databases, and software engineering.

EDUCATION

Graphic Era Hill University, Dehradun
B.Tech in Computer Science and Engineering

Aug 2022 – May 2026
CGPA: 7.22

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL

Web Development: HTML, CSS, JavaScript, React.js, Flask

ML/DL Libraries: TensorFlow, Keras, OpenCV, NumPy, MTCNN

Databases: SQLite, PostgreSQL

Tools: Git, GitHub, VS Code, JupyterLab, Google Colab, Docker

PROJECTS

DeepFake Detection System | Python, EfficientNet-B4, TensorFlow, OpenCV

[GitHub](#)

- Developed an AI-powered deepfake detection web application using EfficientNet-B4 deep learning model.
- Integrated MTCNN for face detection and preprocessing to improve model prediction reliability
- Built a Flask REST API supporting image (JPG, PNG) and video (MP4, AVI, MOV) uploads with confidence scores
- Optimized pipeline to analyze images in under 3 seconds and short videos in under 30 seconds.

Expense Tracker | React.js, Tailwind CSS, Supabase, PostgreSQL, Recharts

[GitHub](#) | [Live Demo](#)

- Developed a full-stack expense tracking application with secure authentication using Supabase Auth and PostgreSQL.
- Implemented full CRUD operations with real-time PostgreSQL database synchronization.
- Built an interactive analytics dashboard with monthly trends, category-wise spending, and responsive data visualizations.
- Designed reusable React components with responsive UI, improving usability across desktop and mobile devices.
- Deployed the application on Vercel with continuous deployment from GitHub, enabling live production access.

Air Quality Predictor | React.js, FastAPI, Random Forest, SQLite, Docker

[GitHub](#) | [Live Demo](#)

- Built a full-stack ML app using a Random Forest sliding window to forecast PM2.5 levels with an R^2 of 0.89.
- Integrated Open-Meteo APIs with FastAPI and SQLite for real-time air quality data.
- Developed a React dashboard with Leaflet maps and Chart.js visualizations.
- Containerized the frontend, backend, and database using Docker Compose for local environments.

CERTIFICATIONS

- Completed the Cybersecurity Job Simulation Analyst certification.
- Earned the Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate certification.
- Completed Introduction to Generative AI by Google Cloud & Simplilearn SkillUp.

COURSEWORK SKILLS

- Data Structures and Algorithms (DSA)
- Machine Learning (ML)
- Database Management Systems (DBMS)
- Object-Oriented Programming (OOP)
- Computer Networks (CN)
- Software Development Life Cycle (SDLC)
- Operating Systems (OS)
